

2012 SUMMARY REPORT

Commercial Feed Inspections

PLANT INDUSTRIES DIVISION
BUREAU OF FEED, SEED, AND TREATED TIMBER

Missouri Department of Agriculture Mission Statement

To serve, promote, and protect the agricultural producers, processors,
and consumers of Missouri's food, fuel, and fiber products.

Bureau of Feed, Seed and Treated Timber 2012 Program Review

The Missouri Department of Agriculture, Plant Industries Division, Bureau of Feed, Seed and Treated Timber assists the state's feed industry and consumers through inspection, product testing and providing information to consumers to assist in making buying decisions. The Summary Report of 2012 Commercial Feed Inspections includes data from more than 1,500 inspections and over 54,000 laboratory tests. This report is provided as a reference and annual review of the Bureau's responsibilities and accomplishments.

The emphasis on food safety has increased in recent years and with that the recognition that feed is food. The Missouri Department of Agriculture, Bureau of Feed, Seed and Treated Timber, in cooperation with FDA, plays an important role in food safety through its role in providing inspection and surveillance for Bovine Spongiform Encephalopathy (BSE) Prevention and Good Manufacturing Practices (GMP) inspections. Bureau inspectors are trained extensively and hold FDA credentials to carry out surveillance inspections. These inspections ensure animal feed is safe and help protect the safety of the food supply for human consumption.

The Bureau performed 250 BSE inspections in 2012. These inspections of Missouri feed facilities reviewed the practices of manufacturers and/or distributors of feed products containing prohibited mammalian protein in compliance with Federal Rule 21 CFR Part 589. These inspections are designed to assure that no prohibited protein is fed to ruminant animals.

Fifteen GMP inspections of federally licensed medicated feed manufacturing establishments were performed by Missouri Department of Agriculture (MDA) staff in 2012. Those inspections are a vital part of the food safety initiative for all animal feed. The program is intended to ensure legally approved levels and combinations of drugs and antibiotics are used in feed products and that each facility's housekeeping, records, labeling, cleanliness and other practices are in order.

The Bureau of Feed, Seed and Treated Timber conducted an annual survey of corn produced in the state. As in past years, corn was tested for crude protein and aflatoxin levels. In 2012, the Feed Control Laboratory added testing capability to determine levels of fumonisin, vomitoxin and zearalenone in the corn survey. Notifications were sent immediately to facilities where corn was sampled containing toxin levels exceeding FDA guidelines for safe use for livestock.

The Bureau of Feed, Seed and Treated Timber also cooperated with the Plant Pest Program and the USDA to obtain samples from Missouri's 2012 wheat production. All samples collected tested negative for karnal bunt wheat disease. The assurance provided by this testing allows Missouri wheat to be exported to many countries that require the testing.

The Bureau of Feed, Seed and Treated Timber inspectors responded swiftly to nine complaints in 2012 about the quality or safety of feed or feed ingredients. When problems required testing beyond the scope of the feed program or the capabilities of the Missouri Feed Control Laboratory, other agencies were utilized or samples were sent to other laboratories for testing.

The Bureau of Feed, Seed and Treated Timber took regulatory action against unlicensed companies or those who failed to file tonnage reports. Those actions are reported in “Violations Other Than Failure to Meet Label Claims.”

The Missouri Feed Control Laboratory reported results on 4688 official samples in 2012. Inspectors routinely collect samples of finished feeds and feed ingredients. Those samples are tested for adherence to label guarantees. If testing reveals a deficiency or excess from the guaranteed analysis or something of a detrimental nature is found, a Withdrawal from Distribution Order is issued immediately. There were 555 withdrawals issued in 2012, for a statewide compliance rate of 88.16 percent.

A total of 419 service and complaint samples were analyzed in 2012. The total number of samples analyzed by the Missouri Feed Control Laboratory was 5136, resulting in 54,313 individual assays in 2012.

The Missouri Feed Control Laboratory analyzed 16 customer-formula samples in 2012. Customer-formula feeds are those for which the customer has designed his own ration and asks for specific ingredients in specific quantities to be blended by the manufacturer. The customer requesting the feed and the manufacturer of the feed each received an analytical report showing nutrient levels found in the sample. In addition, customers received a questionnaire to confirm the quality of feed requested was received.

The Excellence in Compliance Award Program was continued in 2012. Companies are honored who have achieved at least 90 percent adherence to label guarantees on five or more samples. The companies must also have all fees and reporting up to date. A total of 88 guarantor companies qualified for the award, and with that outstanding track record of success, the requirement for the Excellence in Compliance Award is changing for 2013. An overall compliance rate of 95 percent will be required to receive the award for next year.

The Missouri Department of Agriculture’s goal has been, and will continue to be, to serve, promote, and protect our agricultural producers, processors and consumers of Missouri’s food, fuel and fiber products.

U.S. Food and Drug Administration Guidelines for Aflatoxin Levels

Corn containing less than 20 parts per billion aflatoxin is considered safe by the U.S. Food and Drug Administration for use in all animal feed. Corn exceeding 20 ppb can be fed only for specific age, weight, and production stage. Corn exceeding 300 ppb must be blended with corn containing little or no aflatoxin before feeding is allowed to specific age, weight, and production stage of livestock. Before corn can be blended for out-of-state shipment, the U.S. Food and Drug Administration must be notified and permission obtained from the Missouri Department of Agriculture for this to be allowed.

U.S. Food and Drug Administration guidelines are as follows:

Aflatoxin Level (in parts per billion)	Commodities & Species
20 ppb	For corn, peanut products, cottonseed meal and other animal feeds and feed ingredients intended for dairy animals; for animal species or uses not specified below, or when the intended use is not known.
20 ppb	For corn, peanut products and other animal feeds and feed ingredients, but excluding cottonseed meal, intended for immature animals.
100 ppb	For corn and peanut products intended for breeding beef cattle, breeding swine or mature poultry (e.g. laying hens).
200 ppb	For corn and peanut products intended for finishing swine (100 pounds or more).
300 ppb	For cottonseed meal intended for beef cattle, swine or poultry (regardless of age or breeding status).
300 ppb	For corn and peanut products intended for finishing beef cattle (i.e., feedlot cattle).

2012 Corn Survey

The Missouri Department of Agriculture is happy again to report the results on our annual monitoring of aflatoxin in corn. This survey has been reported yearly since 1993. We also analyze all customer complaint samples for aflatoxin when symptoms suggest adulteration. Laboratory tests are conducted to determine the average crude protein in corn. In 2012, the average crude protein for corn was higher than in recent years at 9.12%. Each sample was adjusted to a 13.5% moisture level.

Samples of corn are drawn from counties having an expected production of greater than 1.5 million bushels, with one sample added for each additional two million bushels produced. Aflatoxin was found in 108 of the 194 samples tested. The values reported were in a range from 10-285 ppb. Each time aflatoxin was found, the facility where the sample was taken was notified immediately and FDA guidelines for safe use or proper disposal were supplied.

The Missouri Department of Agriculture is committed to food safety and quality for the protection of our state's consumers. Our mission is to continue to serve, promote, and protect the agriculture producers, processors and consumers of Missouri food, fuel and fiber products.

Crude Protein Summary Last Ten Years

	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012

Findings	42	42	14	5	5	0

2012 STATISTICAL SUMMARY

Total Number of:

Commercial feed licenses issued	1,583
Small package pet and specialty pet food products	6,578
Unpaid products over the maximum fee per labeler	106
Formula feed sold (tons)	1,550,395
Feed ingredients sold (tons)	4,792,475
Feed inspections by inspectors*	1,583

Official labeled samples	4,686
Guaranteed claims tested and reported	25,146
Non-guaranteed claims tested and reported	4,480
Withdrawal from distribution orders issued	554

Custom mix samples	16
Nutrients tested and reported	101

Service samples	419
<u>Nutrients tested and reported</u>	<u>1,495</u>

TOTAL SAMPLES TESTED	5,134
TOTAL VALUES REPORTED	32,010
TOTAL TESTS PERFORMED	54,313

*A feed inspection is defined as one inspection for each facility visited where a “notice of inspection” is written indicating the type of regulatory action taken.

Excellence in Compliance Award

The Excellence in Compliance Award Program was continued in 2012, with companies that achieved at least 90 percent adherence to label guarantees on five or more samples being honored. The companies must also have all fees and reporting up to date. A total of 88 guarantor companies qualified for the award, and with that outstanding track record of success, the requirement for the Excellence in Compliance Award is changing for 2013. An overall compliance rate of 95 percent will be required to receive the award for next year.

Those companies receiving 2012 honors are listed below with those achieving 100 percent compliance in Tier One and companies whose success rate was between 95 and 100 percent in Tier Two. Tier Three lists those with a compliance rate between 90 and 95 percent.

The Missouri Department of Agriculture issues a certificate to honor companies that meet or exceed the following criteria:

- At least five random official regulatory samples were taken by a Missouri Feed and Seed inspector and analyzed by the State Feed Control Laboratory in 2012.
- A 90 percent passing compliance rate on five or more samples achieved for the 2012 calendar year.
- The company labeling the feed or feed ingredient must be in good standing with the Bureau of Feed and Seed retain a Missouri Commercial Feed License and have all quarterly inspection fees or yearly product listing (pet and specialty pet foods) paid as required.

A total of 88 feed labelers achieved a 90 percent or better compliance rate in Missouri in 2012.

Fifty-eight of these companies maintain an address in the state of Missouri and 33 are located outside the state. Many companies with out-of-state addresses have manufacturing facilities in Missouri.

SECTION 1

Section One is intended to show the reliability of labelers in meeting their claims for feed quality. Inspections were planned on a random basis. The greater the number of samples taken per labeler, the greater the probability that the consistency in meeting claims shown will represent how well the labeler met guarantees.
